ABOUT

Backend engineer with 15+ years of experience building reliable, high-performance systems. Started with PHP/Laravel and now specialize in Go — designing scalable APIs, payment integrations, and distributed services with a focus on clean architecture and performance.

EDUCATION

2012 – 2014

Sistem Informasi, S1
STTI NIIT I-TECH

SKILLS

Languages

Go, PHP / Laravel

Databases

PostgreSQL, MySQL, MongoDB, Redis

Messaging

RabbitMQ

Infrastructure

Docker, Linux, Git

Concepts

REST APIs, Microservices, Clean Architecture, Payment Integration

Bias Anthony

Backend Engineer

WORK EXPERIENCE

Backend Engineer

2023 – Present

Aleph Labs · Jakarta

Building payment and banking backends for major Indonesian enterprises.

- **BRI Mystique** (Bank Rakyat Indonesia, Jan 2026 – Present) — Developing Go backend services and secure REST APIs for the bank's digital platform, serving **47.8M+ users**.
- **MYXL** (2023 – Jan 2026) — Built and maintained payment backend services in Go for one of Indonesia's largest telco apps, with **39.1M+ users**.
- Designed REST APIs for top-up and billing flows; secured payment callbacks with HMAC validation.
- Implemented Redis caching to improve API response times; optimized PostgreSQL performance.
- Containerized services with Docker for consistent deployments.

Stack: Go, PostgreSQL, Redis, Docker, REST API

Backend Developer

2018 – 2023

RebelWorks · Jakarta Selatan

Delivered backend systems and payment integrations across multiple client products.

- **Freshbox** — Integrated Midtrans payment gateway for e-commerce checkout.
- **Rootin** — Built Go services with payment gateway integration.
- **Nimbly** — Developed Go + MongoDB services.
- **Cimory** — Automated cost calculations and email notifications.
- **Summit Healthcare** — Built LMS backend on Moodle (PHP/MySQL).
- **Jaya Manex** — Delivered a Laravel application.
- **Dompеткиlat** — Contributed features to the digital-wallet platform.

Stack: Go, Laravel, PostgreSQL, MySQL, MongoDB, Redis, REST API

Web Developer

2011 – 2018

Wira Imaji Nyata · Jakarta Barat

Built and maintained corporate websites and campaign microsites for major brands.

- Delivered sites for **Toshiba Group**, **Bebelac**, **Air Mancur**, **M150**, **PT Monokem Surya**, **Aurora Jewelry**, and others.
- Revamped legacy websites and hardened them against common web attacks.
- Improved website performance and functionality; fixed bugs in existing systems.

Stack: PHP, MySQL, CMS
